### Amos Assist From REVSOFT.

As a purchasing Manager your responsibility is the efficient management of your company's supply chain activities so that goods and services are purchased at the most competitive prices and delivered to their destination on time and in good order.

Your targets are to ensure that the supply chain is properly managed leading to greater efficiency and reduced costs. Innovative solutions offer you the means to use your data effectively, helping you to distinguish between successful and underachieving vendors.

Good supply chain management provides goods and services on time, at the best quality and lowest cost.

Poor supply chain management leads to excessive inventory, shortage of critical items, longer lead times, late deliveries and equipment downtime.

ExAmos, External Amos, is a highly versatile AMOS (Asset Management Operating System) procurement Meta data system developed at the request of professional AMOS users, to fill in the gaps of the existing EMS AMOS suite.

The Amos Enterprise Suite (EMS) delivers a total solution for Marine and Energy industries, combining leading edge maintenance and purchasing with a unique and holistic approach to compliance management.

ExAmos , presents purchasing data in a structured manner, reducing time required to pinpoint a particular order or group of orders for a given vessel, providing efficient quotation comparison for procurement documents and KPI integration thus extending analysis and performance monitoring.

*Your Business Success is our top priority*
